

VISHNU NALLAN

New Jersey (Open to Relocation) | +1 (551) 359-9080 | [EMAIL](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience partnering with healthcare operations, clinical, and technical teams to analyze manual processes, define automation requirements, and deliver scalable, system-driven solutions. Proven ability to **facilitate stakeholder discussions, document business requirements, translate them into technical logic**, and support testing, UAT, and user adoption. Strong background in healthcare data environments, process optimization, SQL-driven automation logic, and dashboard-based monitoring in regulated settings.

TECHNICAL SKILLS

Business Analysis & Automation: Business process analysis, automation opportunity identification, stakeholder interviews, requirements workshops, AS-IS / TO-BE process mapping, business rules definition, user stories, acceptance criteria, functional specifications, business-technical translation

Automation & Workflow Enablement: Workflow-based automation using SQL and Python, rule-based logic, exception handling, scheduled jobs, ETL-driven process automation, integration with upstream and downstream systems, automation feasibility and ROI assessment

Testing, UAT & Change Enablement: UAT planning and execution, test case development, defect tracking and resolution, reconciliation testing, validation controls, stakeholder walkthroughs, user enablement and adoption support

Data Platforms & Tools: SQL Server, Snowflake, Azure Databricks, AWS, Advanced SQL (CTEs, window functions), Python (Pandas)

Reporting, Monitoring & Documentation: Power BI (DAX, data modeling), operational dashboards, KPI and SLA tracking, process documentation, SOPs, BRDs, FRDs, user guides

PROFESSIONAL EXPERIENCE

Graduate Assistant - Financial & Risk Analytics

Jan 2024 – May 2024

Pace University | New York, USA

- **Improved financial and analytical reporting accuracy by 33.4%** by implementing **GL-aligned reconciliation logic and validation checks**, ensuring consistency across income, expense, and performance datasets.
- **Reduced turnaround time for close-support and client-style reporting by 67%** by automating **variance analysis, financial summaries, and supporting schedules** using Excel and SQL.
- **Saved 20+ analyst hours per month** by automating **balance sheet-style reconciliations and financial calculations**, improving reliability and responsiveness to stakeholder requests.
- **Increased forecast and scenario interpretation accuracy by 27%** by building Excel-based financial models incorporating trends, seasonality, and key performance drivers.
- **Improved end-user understanding of financial outputs by 31%** by translating ETF analytics, performance metrics, and variance drivers into **clear documentation and walkthroughs** suitable for non-technical users.
- **Supported finance faculty and student users** by preparing **Bloomberg-sourced datasets, ETF performance views, and valuation summaries**, simulating real-world client support and product explanation scenarios.

Business Analyst, Healthcare IT (Risk & Compliance)

Jun 2021 – Dec 2022

Cardiocrine Genetics | Hyderabad, India

- **Worked closely with clinical operations, billing, and engineering teams** to analyze manual healthcare workflows and assess feasibility for automation.
- **Translated business requirements into functional specifications**, defining data inputs, transformation rules, and acceptance criteria for automated reporting solutions.
- **Acted as liaison between business users and technical teams**, translating reporting needs into SQL logic and Power BI automation requirements.
- **Improved KPI consistency across departments** by collaborating with system owners to **reconcile EHR and LIMS** data through automated SQL workflows.
- **Prevented 40+ production defects** by partnering with QA and engineering teams to execute UAT, validate edge cases, and resolve logic gaps before release.
- **Increased billing accuracy by 19%** by identifying process breakdowns and supporting automation of utilization and reconciliation checks.
- **Supported change adoption** by walking stakeholders through new automated outputs and documenting known limitations and exception handling.

Data Analyst - Analytics & Portfolio Reporting

May 2019 – May 2021

Genething Healthyways | Hyderabad, India

- **Collaborated with Sales, Operations, and Marketing teams** to understand end-to-end business processes and reporting pain points.
- **Mapped manual CRM and operations workflows** and redesigned them into automated ETL-driven reporting pipelines.
- **Increased program participation by 33%** by working with business owners to define KPIs and deploying automated dashboards to track engagement and drop-offs.

- **Reduced reporting rework by 30%** by aligning stakeholders on standardized definitions and implementing pre-release validation checks.
 - **Enabled self-service analytics** by converting recurring stakeholder requests into reusable, automated reporting assets.
-

PROJECTS

Marketing Finance & ETF Performance Analysis (Bloomberg + Excel)

MBA – Finance Coursework Integrated Project

- **Improved investment and valuation interpretation accuracy by 36.2%** by analyzing **ETF returns, volatility, expense ratios, and benchmark variance** using Bloomberg and Excel models.
- **Identified cost-efficiency differences of 14.7%** across comparable ETFs by evaluating **expense ratios, tracking error, and risk-adjusted performance**.
- **Built Excel-based financial and market models** incorporating pricing history, indices, and macro indicators to support decision-making discussions.
- **Translated analytical findings into executive-style summaries**, strengthening client-style communication and product explanation skills.

Predictive Patient Risk Stratification Platform (End-to-End Project)

Stack: PySpark, Scikit-learn, SQL, Snowflake, Power BI

- **Improved risk identification accuracy by 18% lift** over baseline logistic regression by engineering behavioral and utilization-based features and training predictive models.
- **Enabled risk-tier monitoring** by visualizing model outputs, trend indicators, and cohort-level risk segments in executive-ready BI dashboards.
- **Designed a compliant, production-ready ETL pipeline** to ingest, validate, and structure large-scale datasets for advanced analytics.

Open EMR

- Defined **user journeys, approval workflows, and reporting needs** for a simulated EMR system.
- Produced **process maps and functional documentation** mirroring real healthcare automation environments.

Vaxa CVC- Oncology FDG (Freelance Project)

- Analyzed PET, FDG-PET, CT, and MRI utilization data across five Scandinavian countries.
- Delivered insights identifying **8% higher PET utilization** in Denmark, supporting imaging efficiency and AI adoption discussions.

Heart Attack Risk Prediction Using R

- Built a logistic regression model using clinical indicators to predict heart attack risk.
- Conducted EDA and presented insights focused on preventive healthcare decision-making.

Strategic Decision with ESG Practices (Capstone Project)

- Analyzed the relationship between ESG practices and profitability across industries.
- Delivered a decision framework linking sustainability initiatives to long-term business outcomes.

Event & Funnel Analysis Simulation

- **Identified high-risk drop-off points** by modeling event-level user journeys and translating exploratory findings into standardized reporting views.
-

EDUCATION

MBA in Marketing Analytics

Jan 2023 – May 2025

Pace University | New York, USA

Bachelors in Technology | Civil Engineering

Aug 2015 – May 2019

S R University | Warangal, India

CERTIFICATIONS

- McKinsey Forward Program Alumni – Completed global leadership and problem-solving program, focusing on structured thinking, digital transformation, and stakeholder communication.
- Boston Consulting Group Simulation (Forage) – Delivered market entry strategy and growth analysis in a consulting simulation, applying data-driven decision-making and strategic frameworks.
- EA Product Management Simulation – Scoped features, built user stories, and aligned product roadmap with customer insights in a hands-on simulation.
- Machine Learning for Marketing Certification – Applied predictive modeling techniques to real-world marketing datasets, enhancing segmentation and campaign optimization.

Interests

Chess, Investigation, Industry Research, Human Behavior, Consumerism.
