

VISHNU NALLAN

Location, NJ (Open to Relocate) | +1 (551) 359-9080 | [EMAIL](#) | [Website](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Business Analyst with **4+ years** of experience translating clinical and operational requirements into data-driven solutions within genetic screening and healthcare analytics environments. Proven ability to bridge business stakeholders and technical teams by developing **BRDs/FRDs**, validating data using **SQL**, performing data cleaning and exploratory analysis in **Python**, and delivering **Power BI dashboards** with advanced **DAX measures**. Experienced in healthcare interoperability (HL7/FHIR), UAT coordination, regulatory traceability (CAP/CLIA), and **Agile delivery using Jira and Confluence**. Strong analytical foundation with additional exposure to financial data analysis using Bloomberg Terminal, Excel, and automation scripting. **Known for improving process efficiency, increasing reporting accuracy, and accelerating decision-making** through structured requirement management and data validation.

TECHNICAL SKILLS

Business Analysis & Documentation : Business Requirements Documents (BRD), Functional Requirements Documents (FRD), User Stories & Acceptance Criteria, Requirement Traceability Matrix (RTM), Process Flow Diagrams, UAT Planning & Execution, Stakeholder Workshops, Gap Analysis, Regulatory Documentation (CAP/CLIA aligned)

Data Analysis & Querying: SQL (Joins, Aggregations, Data Validation, Data Reconciliation), Data Cleaning & Transformation, Exploratory Data Analysis (EDA), Data Quality Assessment, Root Cause Analysis

Programming & Automation: Python (Pandas, NumPy – Data Cleaning & Basic Analysis), VBA (Excel Automation), Basic Regression Modeling (Excel)

Data Visualization & Reporting: Power BI (DAX, KPI Dashboards, Data Modeling), Microsoft Excel (Pivot Tables, Advanced Formulas, Bloomberg Integration), Dashboard Development & Performance Tracking

Healthcare Systems & Integration: HL7 & FHIR (Requirement Definition & Mapping), LIMS Data Validation, EHR Integration Support (Epic, Cerner – Functional Exposure), Clinical Workflow Mapping

CRM & Sales Analytics Exposure : Salesforce (Data Hygiene, Pipeline Reporting), Sales Funnel Analysis, Forecasting & Territory Analysis

Tools & Methodologies: Jira, Confluence, Agile / Scrum, Sprint Planning & Backlog Grooming, Cross-functional Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Graduate Assistant

Jan 2024 – May 2024

Pace University | New York, USA

- **Processed and analyzed large-scale financial datasets** comprising 14+ ETF portfolios (387+ rows, 69+ columns) using Bloomberg terminal integration in Excel, extracting key performance metrics across 150+ equity instruments.
- **Developed automated data workflows** leveraging Python scripts and VBA macros to clean, validate, and transform Bloomberg terminal data into actionable financial insights, reducing manual processing time by 40%+.
- **Executed complex equity analysis** across diverse ETF categories (Technology, Healthcare, Dividend, Alternative strategies) by parsing Bloomberg data structures and organizing holdings by performance tiers.
- **Organized and categorized financial instruments** across 10-fund groupings, implementing systematic tagging and enumeration methodologies for comparative analysis and portfolio benchmarking.

Business Analyst

Jun 2021 – Dec 2022

Cardiocrine Genetics | Hyderabad, India

- Reduced requirement rework by **42%** and improved development alignment by documenting **85+ functional and non-functional requirements** in BRDs and FRDs within **Confluence**, by conducting structured workshops with cardiologists, lab teams, compliance officers, and IT stakeholders
- Improved genetic test data accuracy to **98%** and reduced variant annotation discrepancies by **64%** by **writing SQL queries** to validate lab output tables, cross-check sequencing results, and reconcile data across LIMS and reporting systems.
- Increased cardiologist adoption of genetic risk reports to **89% within 6 months** by defining **HL7/FHIR mapping requirements** and validating **API data payloads** between **LIMS and Epic/Cerner systems** in collaboration with Data Engineers.
- Reduced time-to-clinical-decision by **56%** by **building Power BI dashboards using DAX measures** to track patient risk tiers, turnaround time (TAT), and intervention rates, enabling real-time monitoring of **6,000+ cardiac genetic tests**.
- Achieved **100% UAT pass rate across 150+ test scenarios** and zero CAP/CLIA audit findings by designing structured test cases, executing **SQL-based backend validations**, and **maintaining traceability matrices** linking requirements to regulatory controls.
- Improved cross-functional delivery **timelines by 35%** by **mapping end-to-end data flow** (sample collection → sequencing → annotation → reporting), documenting **process diagrams in Confluence**, and coordinating **sprint ceremonies using Jira**.

Sales Operations Analyst

May 2019 – May 2021

Genething Healthyways | Hyderabad, India

- Improved quote-to-close **conversion by 27%** and increased quarterly revenue by **\$1.2M** by **analyzing CRM exports in SQL** and Excel, identifying **34% stage drop-offs**, and recommending structured follow-up cadence improvements.
- Improved visibility into **pipeline health by 60%** by **building Excel and Power BI dashboards** tracking conversion rates, sales cycle length, deal size distribution, and rep productivity.
- Achieved **91% forecast accuracy** by analyzing 24-month historical sales data using **SQL aggregations and Excel regression models** to project seasonal demand patterns.

- Increased average deal size by **18% by conducting SQL-based margin analysis** across service tiers and recommending revised discount structures aligned with competitor benchmarking.
- Improved quota attainment from **72% to 90% by segmenting 50 healthcare** markets using demographic and provider concentration data and recommending balanced territory allocation.
- Reduced reporting **discrepancies by 55%** by standardizing opportunity stages, cleaning duplicate records in Salesforce, and implementing structured weekly pipeline review processes.

PROJECTS

Predictive Patient Risk Stratification Platform (End-to-End Project)

Stack: PySpark, Scikit-learn, SQL, Snowflake, Power BI

- Architected a HIPAA-compliant ETL pipeline ingesting synthetic claims and clinical data into a Snowflake warehouse.
- Engineered feature sets from ICD-10, CPT, and utilization history to train patient risk models.
- Built a PySpark-based predictive model identifying high-risk patients with 18% lift over baseline logistic regression.
- Visualized risk tiers and care gaps in Power BI to simulate VBC intervention prioritization.

Event & Funnel Analysis Simulation

- Modeled user journeys and event-level data to analyze funnel performance and drop-off points.
- Converted exploratory analysis into reusable reporting views aligned with stakeholder definitions..

Open EMR

- Defined functional requirements and workflows for a simulated Electronic Medical Records (EMR) module.
- Documented user journeys, data flows, and reporting needs to mirror real clinical environments.

Vaxa CVC- Oncology FDG (Freelance Project)

- Analyzed PET, FDG-PET, CT, and MRI utilization data across five Scandinavian countries.
- Delivered insights identifying **8%** higher PET utilization in Denmark, supporting imaging efficiency and AI adoption discussions.

Heart Attack Risk Prediction Using R

- Built a logistic regression model using clinical indicators to predict heart attack risk.
- Conducted EDA and presented insights focused on preventive healthcare decision-making.

Strategic Decision with ESG Practices (Capstone Project)

- Analyzed the relationship between ESG practices and profitability across industries.
- Delivered a decision framework linking sustainability initiatives to long-term business outcomes.

EDUCATION

MBA in Marketing Analytics

Pace University | New York, USA

Jan 2023 – May 2025

Bachelors in Technology | Civil Engineering

S R University | Warangal, India

Aug 2015 – May 2019

CERTIFICATIONS

- McKinsey Forward Program Alumni – Completed global leadership and problem-solving program, focusing on structured thinking, digital transformation, and stakeholder communication.
- Boston Consulting Group Simulation (Forage) – Delivered market entry strategy and growth analysis in a consulting simulation, applying data-driven decision-making and strategic frameworks.
- EA Product Management Simulation – Scoped features, built user stories, and aligned product roadmap with customer insights in a hands-on simulation.
- Machine Learning for Marketing Certification – Applied predictive modeling techniques to real-world marketing datasets, enhancing segmentation and campaign optimization.

Interests

- Chess, Investigation, Industry Research, Human Behavior, Consumerism.
