PROFESSIONAL SUMMARY

Sales Operations & Product Analytics professional with 4+ years of experience supporting growth initiatives in D2C healthcare and financial data analysis environments. Background includes progression from Sales Operations Analyst to Product Analyst within the same organization, followed by MBA specialization in Marketing Analytics and graduate-level finance research support. Skilled in SQL, Excel automation, Tableau, CRM analytics, and financial data analysis. Known for translating complex datasets into practical insights that improve conversion, retention, and operational visibility. Seeking opportunities in Sales Operations, Product Analytics, or Revenue-focused analytical roles.

TECHNICAL SKILLS

CRM & Sales Operations: HubSpot | Salesforce (basic exposure) | Pipeline tracking | Lead analysis | KPI reporting

Data & Financial Analysis: SQL (complex queries, joins, reporting) | Python (data cleaning & transformation) | Bloomberg Terminal | Excel (Pivot Tables, INDEX-MATCH, VBA)

Visualization & Reporting: Tableau | Google Analytics 4 | Dashboard development | Business reporting

Analytics Methods: A/B testing support | Segmentation | CAC/LTV analysis | Trend analysis | Cohort tracking

CORE COMPETENCIES

Sales Operations: Pipeline analysis | CRM data management | Conversion tracking | Customer retention analysis | Forecast support | KPI reporting

Product & Customer Analytics: Customer journey analysis | Funnel performance | Cohort analysis | Segmentation | Product performance tracking | Experiment analysis

Financial & Business Analytics: ETF and equity dataset analysis | Financial reporting support | Data validation | Automated reporting | Performance analysis

Technical Tools: SQL (BigQuery, PostgreSQL) | Python (data processing) | Excel (Advanced formulas, VBA) | Tableau | HubSpot CRM | Bloomberg Terminal

PROFESSIONAL EXPERIENCE

Graduate Assistant

Jan 2024 – May 2024

Pace University | New York, USA

- **Analyzed** financial performance across **150+ equity instruments and multiple ETF portfolios** by extracting and organizing Bloomberg data within Excel for comparative evaluation.
- **Reduced** financial data preparation time by **streamlining repetitive workflows** by automating data cleaning, validation, and transformation tasks using Python and VBA.
- **Improved** data accuracy and accessibility for **430+ faculty records** by building structured Excel databases using advanced lookup and validation formulas.
- **Simplified** data retrieval for non-technical stakeholders by **automating roster management processes** through VBA-based tools and conditional logic.

Business Analyst, Healthcare IT (Risk & Compliance)

Jun 2021 – Dec 2022

Cardiocrine Genetics | Hyderabad, India

- **Improved** customer retention by **12 percentage points (30% → 42%)** by analyzing customer engagement patterns and identifying behaviors linked to long-term product usage that informed marketing and product adjustments.
- **Increased** funnel conversion rates by **approximately 35%** by conducting step-by-step acquisition funnel analysis, identifying key drop-off points, and supporting landing page testing initiatives.
- **Reduced** reporting turnaround time from **multiple days to same-day analysis** by building SQL-based reporting pipelines and Tableau dashboards that provided centralized KPI visibility for cross-functional teams.
- **Strengthened** marketing efficiency through **higher lifetime value tracking and improved campaign ROI** by performing customer segmentation analysis that identified high-value user groups and informed budget allocation decisions.
- **Supported** faster business decision-making through **weekly KPI alignment across teams** by partnering with Sales, Marketing, and Finance to standardize metric definitions and review performance insights.

Sales Operations Analyst

May 2019 – May 2021

Genething Healthyways | Hyderabad, India

- **Raised** signup conversion by **about 18%** by analyzing onboarding journey data, identifying abandonment points, and supporting design improvements during account creation.
- **Improved** retention visibility across leadership through **tracking early engagement behaviors linked to 3x stronger retention** by developing Tableau dashboards focused on customer activity patterns.
- **Enhanced** sales pipeline accuracy by **maintaining 50,000+ CRM records** by improving data quality practices and standardizing data entry and segmentation processes.
- **Enabled** more targeted outreach and performance tracking through **consistent KPI reporting** by preparing recurring sales and marketing analytics used in weekly strategic reviews.

- **Aligned** cross-functional reporting through **shared metric definitions and consistent dashboards** by collaborating with Sales, Marketing, Product, and Finance stakeholders.

PROJECTS

Marketing Finance & ETF Performance Analysis (Bloomberg + Excel)

MBA – Finance Coursework Integrated Project

- **Improved investment and valuation interpretation accuracy by 36.2%** by analyzing **ETF returns, volatility, expense ratios, and benchmark variance** using Bloomberg and Excel models.
- **Identified cost-efficiency differences of 14.7%** across comparable ETFs by evaluating **expense ratios, tracking error, and risk-adjusted performance**.
- **Built Excel-based financial and market models** incorporating pricing history, indices, and macro indicators to support decision-making discussions.
- **Translated analytical findings into executive-style summaries**, strengthening client-style communication and product explanation skills.

Predictive Patient Risk Stratification Platform (End-to-End Project)

Stack: PySpark, Scikit-learn, SQL, Snowflake, Power BI

- **Improved risk identification accuracy by 18% lift** over baseline logistic regression by engineering behavioral and utilization-based features and training predictive models.
- **Enabled risk-tier monitoring** by visualizing model outputs, trend indicators, and cohort-level risk segments in executive-ready BI dashboards.
- **Designed a compliant, production-ready ETL pipeline** to ingest, validate, and structure large-scale datasets for advanced analytics.

Open EMR

- Defined **user journeys, approval workflows, and reporting needs** for a simulated EMR system.
- Produced **process maps and functional documentation** mirroring real healthcare automation environments.

Vaxa CVC- Oncology FDG (Freelance Project)

- Analyzed PET, FDG-PET, CT, and MRI utilization data across five Scandinavian countries.
- Delivered insights identifying **8% higher PET utilization** in Denmark, supporting imaging efficiency and AI adoption discussions.

Heart Attack Risk Prediction Using R

- Built a logistic regression model using clinical indicators to predict heart attack risk.
- Conducted EDA and presented insights focused on preventive healthcare decision-making.

Strategic Decision with ESG Practices (Capstone Project)

- Analyzed the relationship between ESG practices and profitability across industries.
- Delivered a decision framework linking sustainability initiatives to long-term business outcomes.

Event & Funnel Analysis Simulation

- **Identified high-risk drop-off points** by modeling event-level user journeys and translating exploratory findings into standardized reporting views.

EDUCATION

MBA in Marketing Analytics

Jan 2023 – May 2025

Pace University | New York, USA

Bachelors in Technology | Civil Engineering

Aug 2015 – May 2019

S R University | Warangal, India

CERTIFICATIONS

- McKinsey Forward Program Alumni – Completed global leadership and problem-solving program, focusing on structured thinking, digital transformation, and stakeholder communication.
- Boston Consulting Group Simulation (Forage) – Delivered market entry strategy and growth analysis in a consulting simulation, applying data-driven decision-making and strategic frameworks.
- EA Product Management Simulation – Scoped features, built user stories, and aligned product roadmap with customer insights in a hands-on simulation.
- Machine Learning for Marketing Certification – Applied predictive modeling techniques to real-world marketing datasets, enhancing segmentation and campaign optimization.
